

August, 2009

Dear Parent,

The Structural Pest Control Act and the Illinois Pesticide Act regulates how pests, mice, ants, etc. are controlled in schools.

The legislation affects the schools in basically two ways. (1) All Illinois schools are required to adopt a pest control process called Integrated Pest Management or IPM and (2) schools are required to notify staff, students and parents prior to certain types of pest control applications.

Integrated Pest Management emphasizes inspection and communication with the school administration. The focus of the program is to identify and eliminate conditions in the school which could cause pests to be a problem. Applications of pest control materials are made only when necessary to eliminate a pest problem. Regular spraying is not part of the program.

If it becomes necessary to use any pest control products other than traps or baits, notice will be posted two business days prior to the application. The only exception to the two day notice would be if there is an immediate threat to health or property. Then notice will be posted as soon as practicable. If you would like to receive written notification prior to the application of any pest control materials subject to the notification requirements, please complete the enclosed form and return it to the school.

Sincerely,

Shelley Clark  
Chief Financial/Operating Officer

---

I would like to be notified two days before the use of liquid or aerosol pest control materials at the school.
